Dear visitors and friends of Chalki, you make a difference !

You are spending your holidays on the Island of Chalki because – among other reasons – it has kept its natural beauty, the charm of its old houses and the crystal clear water. Goats, sheep, chicken, pigeons, dogs and cats are part of the ecological balance of the island. But where have the cats gone ? Only some years ago everyday they assembled on the harbourfront in wait of incoming fisher boats and of their share of the fish. This does not exist anymore. Those cats which survive illnesses and poisoning – even of the neutered ones – need your help.

What can you do ?

- You can help by convincing your Greek friends and acquaintances of how important the protection of animals is for you and your well-being on the Island.
- You can help by offering your yard or garden in the winter to the Animal Help of Chalki and the Animal Welfare Society of Chalki in order to ensure the safe feeding of the cats in winter.
- You can help by donations to our Bank Accounts and by putting money into the piggy bank at Zifos` Travel Agency.

What will we do?

Our aims and options

Protection and ethical treatment of the animals

Every year, many animals on the island must die because of illness, malnutrition, injuries or killing actions in winter.

Education of the population, especially on animal protection and about the fact that all animals contribute to the ecological balance and thereby perform an important function, which has great importance for the tourism.

Feeding: Securing sufficient food for free living cats and dogs in winter, in times of low tourism, at protected feeding spots. For this purpose we need helpers and money for the food.

Neutering programs and medical aid for ill and injured animals. Veterinarians visiting the island on behalf of our associations will neuter / spay the cats regularly, in order to prevent uncontrolled procreation and killing actions resulting thereof. The veterinarians will also take care of injured animals and of farm animals in poor or critical conditions.

Who are we ? The „Animal Help Chalki“ is a non-profit association which works for the welfare of animals, especially for cats and dogs on the island of Chalki (Halki) / Dodekanes, founded in Germany 2008. Our members engage themselves in their protection and ethical keeping. We co-operate with the Animal Welfare Society “Filosoikos Syllogos Chalkis”, founded in 2007. The members are residents in Chalki from Greece and various foreign countries as well as visitors and friends of the island.
